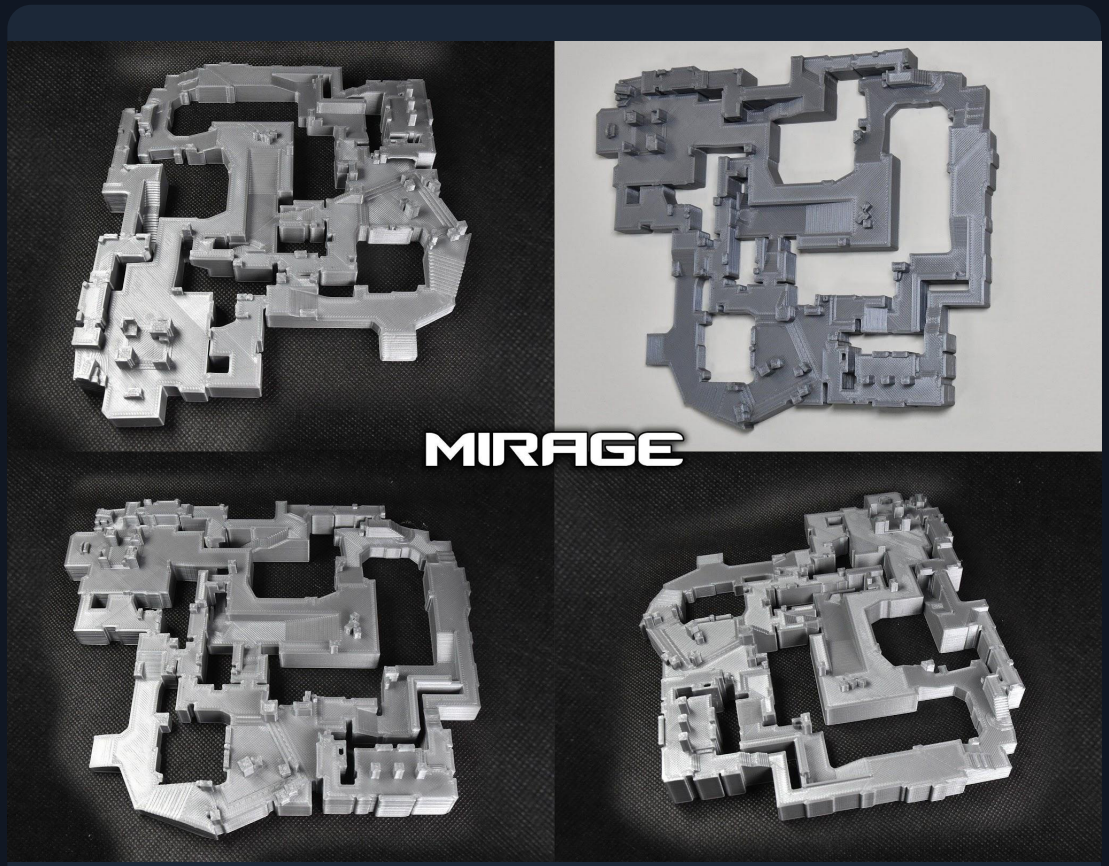
MIRAGE / 3D REFERENCE ATLAS

CS:GO ERA | KAPSAPP GAME MAP DESIGN

12 embedded reference images • 3 radar views • 3D overview • 7 perspective photos



PRIMARY PRIORITY

Correct walkable layout, site connections and sightlines before decoration.

How to use this reference book

READING ORDER AND RELIABILITY

---

01 **Radar and overall footprint**

CS:GO radar and labeled top-down variants

02 **3D geometry**

Multi-angle architectural miniature; height approximations only

03 **A site**

Stairs, Tetris, Ramp, Palace, Jungle, CT route

04 **B site**

Apartments, Van, Market, Short, Back Site

05 **Middle**

Top Mid, Window, Connector, Underpass, Catwalk

06 **Route graph and implementation**

Path continuity, collision and validation

07 **Extra source galleries**

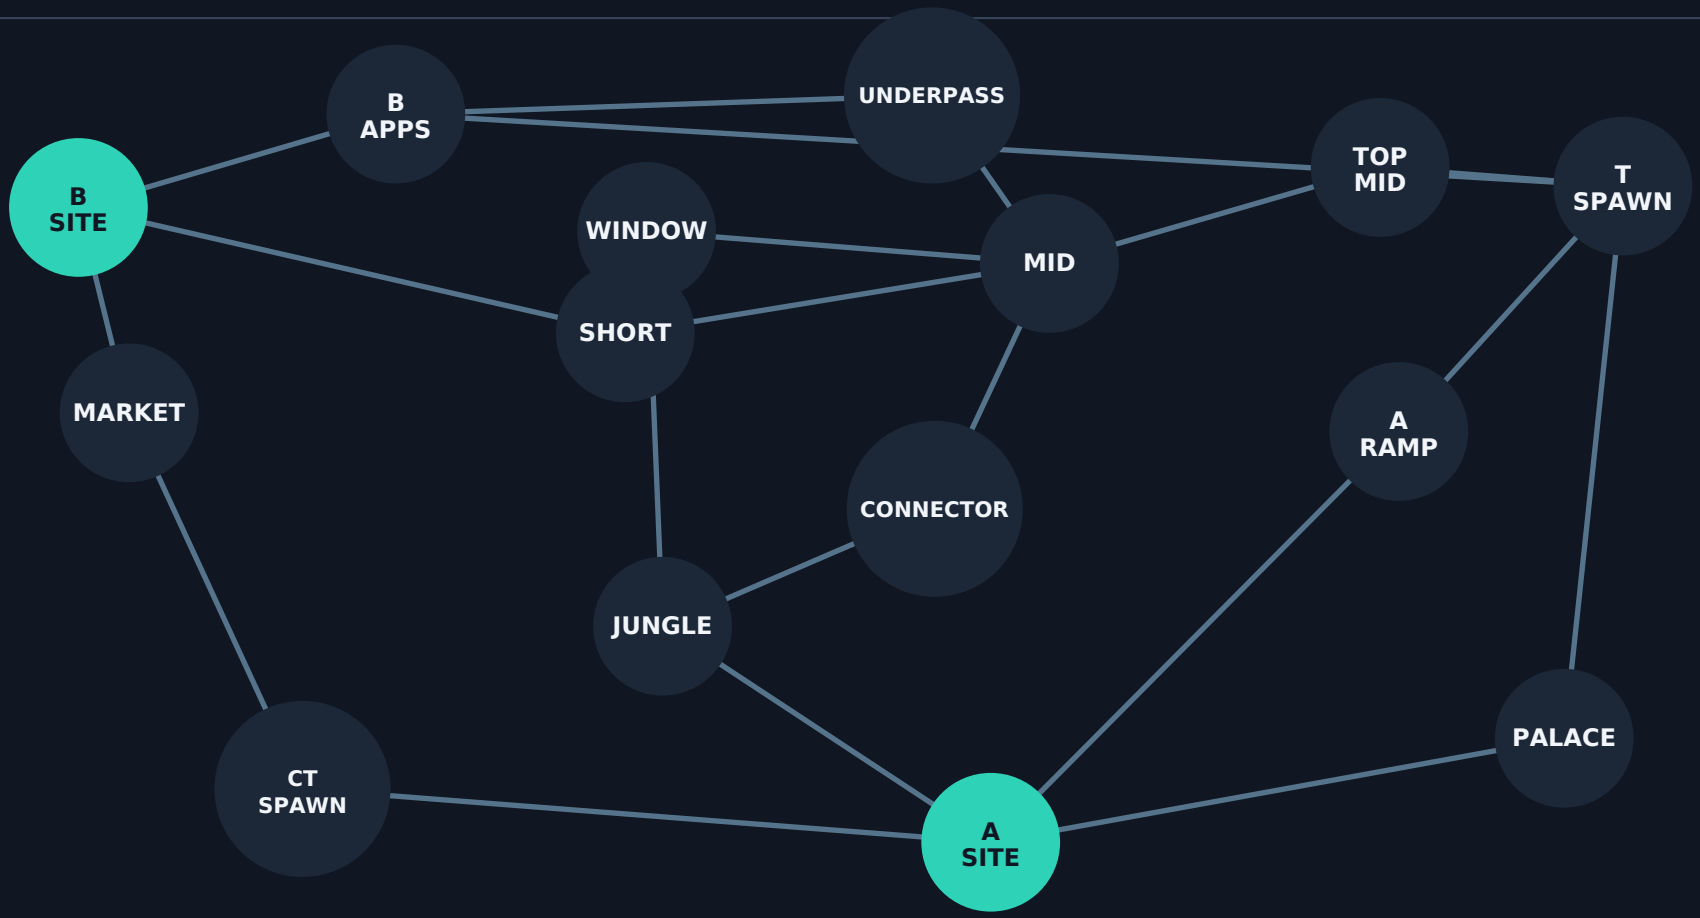
Screenshots that could not be embedded

IMPORTANT: these references are not an extracted 3D mesh or dimensioned engineering drawing.

Map connectivity schematic

CONCEPTUAL GRAPH / NOT TO SCALE

Use the embedded radars on following pages for position and proportion.



ROUTE GRAPH = TOPOLOGY ONLY

Not suitable for exact coordinates, angles, room sizes, floor elevations or wall thickness.

Original CS:GO radar

IMAGE 01 / 12 · GLOBAL OVERVIEW / TERRAIN FOOTPRINT

Embedded photographic reference. Source link included at foot of page.

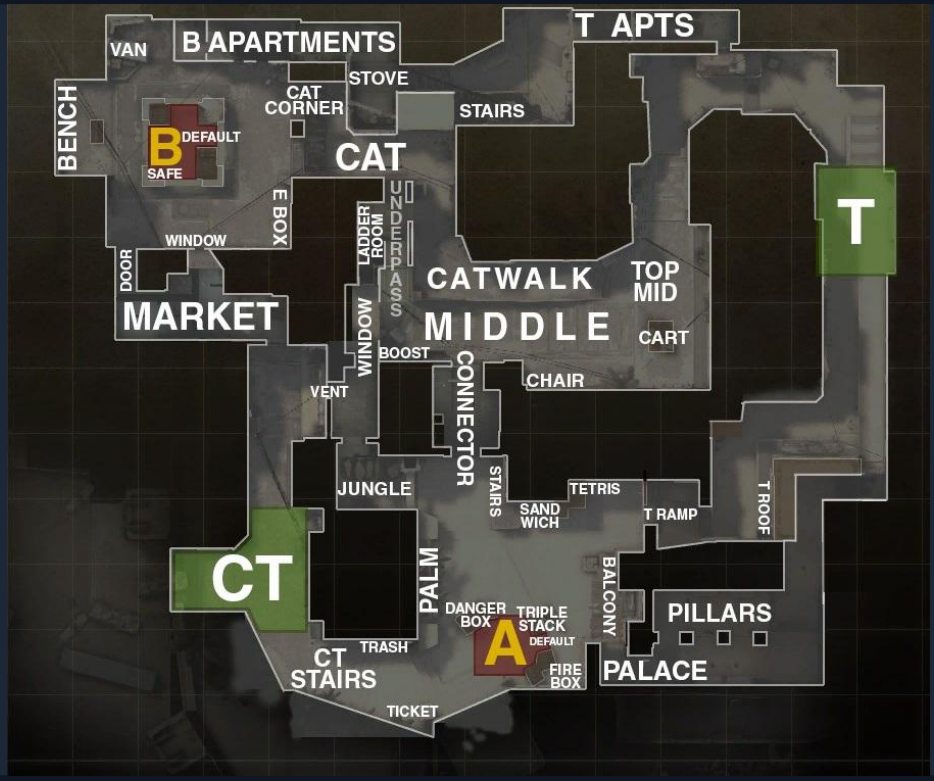
Use as the base guide to the broad footprint, roof massing, streets and visual map silhouette.

SOURCE: https://static1.millenium.org/article_old/images/contenu/actus/CSGO/Maps/mirage.jpg

Annotated callout map

IMAGE 02 / 12 · GLOBAL OVERVIEW / NAMED POSITIONS

Embedded photographic reference. Source link included at foot of page.



Cross-check A and B entry points, the mid spine, Jungle, Connector, Catwalk and T/CT separation. Text is a naming guide, not a collision mask.

SOURCE: https://images.steamusercontent.com/ugc/931554890100485222/F75A9A630A50FE6AF96CCBD91F96238183CF11E4/

Modern labeled minimap

IMAGE 03 / 12 · SUPPLEMENTARY ORIENTATION / COMPARE VERSIONS

Embedded photographic reference. Source link included at foot of page.

Compare location labels against the classic radar. Do not transfer later visual redesigns into a strict CS:GO remake without confirming them.

SOURCE: https://assets.csnades.gg/2/mirage_download_0198373fd1.png

Alternative labeled radar

IMAGE 04 / 12 · NAVIGATION AND NAMED SECTORS

Embedded photographic reference. Source link included at foot of page.

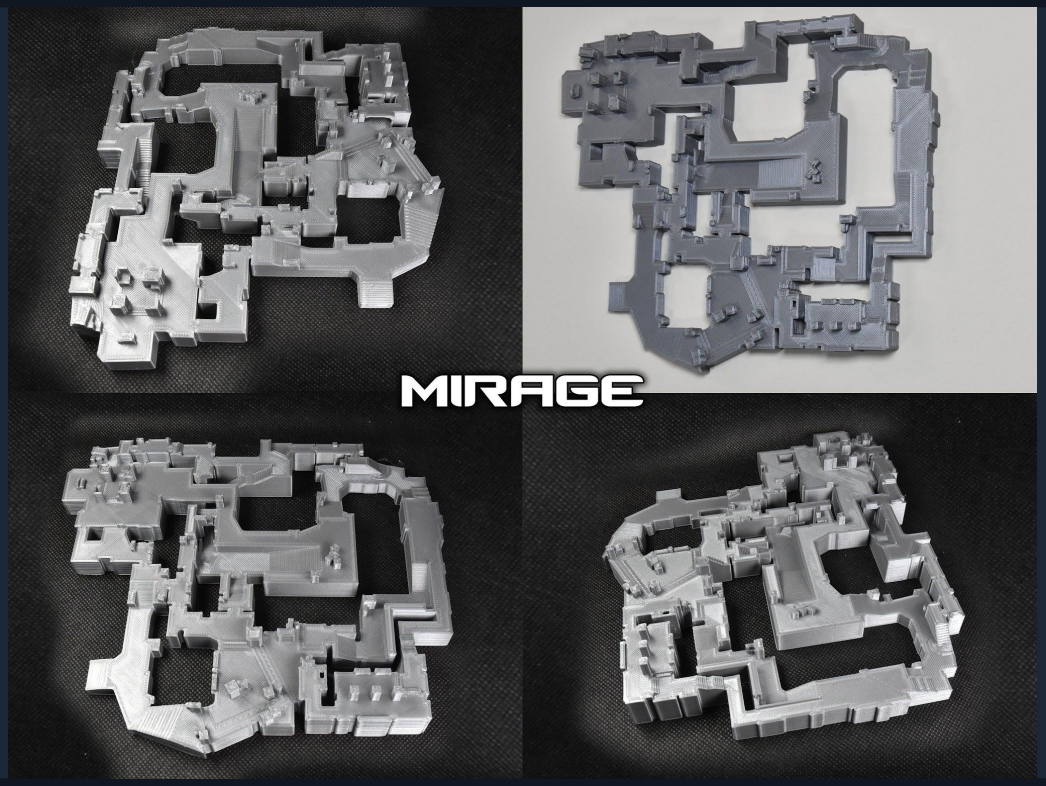
Useful for identifying Apartments, Kitchen, CT spawn, Jungle, Palace and connecting streets.

SOURCE: https://img.redbull.com/images/q_auto%2Cf_auto/redbullcom/2020/5/5/xusxozsa0jsckncqarvu/mirage-karte

Four-angle 3D Mirage miniature

IMAGE 05 / 12 · ARCHITECTURAL MASSING / MULTIPLE VIEWPOINTS

Embedded photographic reference. Source link included at foot of page.



Shows relative placement of building blocks and exposed courtyards from four views. This is a community-made representation; do not use as ground truth for dimensions.

SOURCE: https://i.pinimg.com/originals/1f/bc/0d/1fbc0d3d53c1406a321b6d6d5efbb006.jpg

A site - overhead blockout

IMAGE 06 / 12 · A SITE GEOMETRY / CS:GO

Embedded photographic reference. Source link included at foot of page.

Identify CT stairs, triple/default cover, platform edges and site entry line. Good guide to cover relationships and broad site shape.

SOURCE: https://images.steamusercontent.com/ugc/595883498891734986/055DE5779A66D9678EEC7FBA49522C71BE5699B2/

B site - 3D overhead

IMAGE 07 / 12 · B SITE GEOMETRY / CS:GO

Embedded photographic reference. Source link included at foot of page.

Shows green-roofed central structure, Market-facing side, B approach and layered building facades. Verify accessible edges separately.

SOURCE: https://images.steamusercontent.com/ugc/595883498891737417/E240B4CC2634977189D4E87416CE8223F5ACB1BD/

A site - diagonal overhead

IMAGE 08 / 12 · SITE ELEVATION / CS:GO

Embedded photographic reference. Source link included at foot of page.

Check site crates, raised steps, ramp sightline and internal scale relationships at A.

SOURCE: https://scope.gg/guides/content/images/size/w1000/2022/04/retakes_map1-1.png

B site - alternate high view

IMAGE 09 / 12 · B SITE FACADE / CS:GO

Embedded photographic reference. Source link included at foot of page.

Observe B cover, surrounding structures, market window/door side and central canopy geometry.

SOURCE: https://egamersworld.com/uploads/blog/1636211427231.jpg

B site - from interior arch

IMAGE 10 / 12 · B SITE APPROACH / CS:GO

Embedded photographic reference. Source link included at foot of page.

Check the arch opening, sightline to B site and visible hard cover. This view should match the overhead orientation.

SOURCE: https://egamersworld.com/cdn-cgi/image/width%3D690%2Cquality%3D75%2Cformat%3Dwebp/uploads/blog/16362114285083....

Mid - elevated sightline

IMAGE 11 / 12 · MID / UPPER STRUCTURES / CS:GO

Embedded photographic reference. Source link included at foot of page.

Use for stacked facades, narrow vertical spaces and sightline across the mid section. Do not mistake traversable routes for background architecture.

SOURCE: https://i.imgur.com/LxsXfC4g.jpg

Catwalk - ground-level view

IMAGE 12 / 12 · B SHORT / MID-TO-B LINK / CS:GO

Embedded photographic reference. Source link included at foot of page.

Use to match alley width, cover stacks and the change in visual framing when entering Short.

A SITE - BUILD SPEC

GEOMETRY AND VALIDATION

- Main T entries are A Ramp and Palace; Mid opens into the A side through Connector/Jungle; CT rotates via Ticket/CT.
- Preserve climbable cover only where supported by the game. Stairs, Tetris, triple/default stacks and elevated Palace ledge require separate collision pieces.
- Create at least six validation camera points: Ramp exit, Palace exit, Default box, Stairs, Jungle entrance and Ticket/CT approach.
- Test lines of sight from Ramp to Stairs/CT and from Palace to Default/Triple; do not accidentally fill or open a wall.

B SITE - BUILD SPEC

GEOMETRY AND VALIDATION

- B Apartments is the primary T entrance; B Short/Catwalk provides a second approach; defenders enter from Market door/window and CT rotation.
- Model Van, Bench, back site, Market walls, B Apartments exit and the center canopy/cover as separate collidable assets.
- Verify Market window is a sightline opening and Market door is a true traversable exit. Keep distinct, with correct wall blocking elsewhere.
- Test full paths Apartments to B, Short to B, Market to B and from B to each exit without dead ends or corner snags.

MID - BUILD SPEC

CENTRAL NETWORK

- The central route includes Top Mid, Middle, Underpass, Connector, Window and Catwalk. This is the main junction between the two bomb sites.
- Window is an elevated CT viewpoint over Mid, not a normal ground-level street connection. Ladder Room and Vent need clear gameplay intent.
- Connector must allow Mid-to-A travel. Catwalk/Short must allow Mid-to-B travel. Underpass connects the lower route to the apartment/middle network.
- Validate all elevation transitions, stairs, jumps, collision, player camera visibility and bullet raycasting through openings.

SPAWNS & MAP BOUNDARIES

FINAL TOPOLOGY

- Keep T Spawn linked to Ramp/Palace, B Apartments and Top Mid. Keep CT Spawn linked to A/Ticket, Market/B and the Window-side interior routes.
- Map outer facades may be scenery, but accessible corridors must be enclosed with no accidental gaps. Use invisible collision only when visually justified.
- Each spawn requires multiple safe positions, 4-second spawn protection if KapsStrike enables it, and enough space for team spawning.
- Check bomb zone definitions and ensure out-of-bounds geometry, roofs and shortcuts cannot be exploited.

Implementation sequence

RECOMMENDED INSTRUCTIONS FOR THE MODELLING AI

---

01 **Import layout**

Use the original CS:GO radar as the major reference; establish orientation and unit scale.

02 **Whitebox**

Build traversable floors, walls, stairs, ramps, windows and the two sites without decorative geometry.

03 **Navigation QA**

Check every required site/spawn/connector path and fix holes before textures.

04 **Height and cover**

Match major vertical differences, crates, van, booth, market apertures and sightlines.

05 **Art pass**

Add source-inspired architecture and wall surfaces without modifying walkable boundaries.

06 **Gameplay verification**

Run two-player route, bullets, grenade throws, bomb placement, round reset and spawn tests.

07 **Regression**

Retest routes and collision after every visual iteration.

Acceptance checklist

USE THIS AS A MINIMUM STANDARD BEFORE RELEASE

- [ ] All T-to-A paths (Ramp and Palace) and T-to-B path (Apartments) are continuous.
- [ ] Mid to Connector to A and Mid to Short to B are continuous.
- [ ] Window, Ladder Room, Underpass and Market are connected according to their actual openings.
- [ ] A and B have correct distinct plant zones, cover collision and safe round reset locations.
- [ ] No hidden gaps at tunnels, corners, wall seams, stairs, box tops or inaccessible roofs.
- [ ] Grenades are throwable and collide appropriately with terrain and visible objects.
- [ ] Bullets are blocked by solid walls and pass through intended openings only.
- [ ] No accidental large open plazas replace the dense Mirage street geometry.
- [ ] Visual minimap corresponds to the final accessible 3D geometry.
- [ ] Desktop, tablet and mobile render and collision behavior are checked.

Supplementary image collections

LIVE REFERENCE LINKS THAT WERE NOT EMBEDDED

Open in browser and compare original CS:GO screenshots with any later CS2 visuals.

Source use and limits

IMPORTANT BOUNDARIES FOR A PRODUCTION MAP

- This is a reference atlas rather than an exact source-engine export: it cannot guarantee centimetre-accurate scale, obstacle heights or a one-to-one replica.
- Embedded imagery comes from third-party sites/Steam and remains attributable to the respective owners. Check intellectual property/licensing before publishing copied assets.
- Use the screenshots as layout and visual references. Build your own geometry, textures, decals and props rather than extracting proprietary game assets.
- CS:GO-era images should be prioritized for a CS:GO remake. CS2 sources are supplemental, because texture/lighting can differ between versions.
- Top-down screenshots alone are insufficient to recover all interiors, props, sightlines and height changes. Verify against gameplay capture or an authorized in-game observer pass.

RECOMMENDED SUCCESS CRITERION

Correct paths, collision and combat lines first; visual similarity second. Do not claim exactness until live testing passes.
